CLARESHOLM LOCAL NEWS

Born, on September 22, to Mr. and Mrs. Eric Todd, a son.

Mr. H. Hughes and family have moved into apartments over the drug store.

J. W. McPhee and family have moved into Major School's house on Third avenue.

Major School left last week for Vancouver, on his way to the States to resume his lectures.

"Adventure," adapted from the novel by Jack London, at the Rex theater on Friday and Saturday nights this week.

All electric light patrons are warned against using fuse plugs of more than 15 amperes. The use of fuse plugs of higher amperage greatly endangers your property.

The Stately Advertiser has changed hands, J. D. S. Barrett, formerly of the Coleman Journal, having taken the paper over from L. C. Newsom, who has owned it for the past seven years.

The first killing frost of the fall visited this district on Sunday night, September 21. Tender vegetables and flowers were effectively put out of business. The mercury dropped to six degrees below the freezing point.

The ladies of the Catholic church will give a series of fortnightly bridge parties during the fall and winter. The first will be held at the Queen's Hotel on Thursday next, October 1st, at 8:30. All are invited.

Special Harvest Thanksgiving services will be held in St. John's church, Clareholm, on Sunday, October 4th. These services will also mark the conclusion of Mr. Marshall's ministry in Clareholm. The church will be specially decorated for the occasion.

A first class rendition of "The Mikado" was given by the Brandon Company at the Rex on Monday night, before a well filled house. On account of having an open date for Tuesday night the company put on a vaudeville performance here, which was also well attended.

With the change to dry weather threshing was resumed the first of the week, though the grain is still tough from last week's soaking rains. Damage from sprouting in the stock proves to be much less than had been feared. At the time this record closes weather conditions are very unpropitious.

W. W. Stickney, formerly of Clareholm but now residing at Chihuahua, Mexico, was shaking hands with old friends in town on Wednesday. Mr. Stickney was connected with The Clareholm Review in its early days, having taken a prominent part in getting out the first issue of the paper.

Mrs. Taylor, superintendent of the hospital, desires to express her appreciation of the gift of the splendid array of vegetables shown at the local School Fair last Monday. To the exhibitors who donated the vegetables to the hospital, and to the Boy Scouts who so kindly brought them to the hospital cellar, her thanks are hereby tendered.

The local Masonic Lodge attended in a body the evening service at St. John's church last Sunday. Rev. W. Marshall conducted the service and preached on the Ideals of Freemasonry, basing his address on St. Paul's advice to St. Timothy: "Study to show thyself approved unto God, a workman that needeth not to be ashamed."

CLARESHOLM SCHOOL FAIR GREAT SUCCESS

What was probably the best School Fair ever held in this district drew a considerable number of people to the Agricultural College on Monday. Owing to the very inclement weather the Fair had been postponed, but this turned out to be an advantage, and many were able to attend who could not have done so but for the delay in threshing. The attendance was the best in the history of local fairs, and the exhibits were of an unusually high order. In the school work one local pupil exhibited twelve sam-

ples of art which won unstinted praise from the judges.

The big feature of the fair this year was the school parade. This is not a new thing, but special pains were taken by the various teachers to make it a success. Each school carried banners and had some distinctive feature, but it was conceded by all that the Clareholm junior grades should head the list of prize winners. The little ones were dressed in Red Cross uniforms, and carried Junior Red Cross banners, the local school taking a considerable interest in Junior Red Cross service. A dainty ambulance carried a little patient and was drawn by two dogs.

Starting school had a float decorated with sheaves and stars, while Greenbank school had a novel presentation of school studies. The fourth prize was won by the smallest school in the district, Schaeffer school, which has only six pupils.

There was a fine display of cooking, and while the sewing exhibits were not many, they were of a good class. A number of pupils neglected to follow the directions in the bulletin, while others exhibited classes not included in the local prize list. There was the usual splendid display of vegetables, and this year a new departure was the donation by many children of vegetables to the local hospital.

A splendid staff of rural ladies under the leadership of Mrs. McKinney prepared a lunch which was greatly enjoyed.

This year the fair was marked by the presence of the local Scouts and Guides, all of whom did very valuable work. The Guides under their captain, Mrs. Cornelius, served lunch to the rural children, while the Scouts were assigned to various duties and worked hard and cheerfully all through the day, finally carrying the vegetable donations to the hospital. Much favorable comment was heard about these boys and girls who looked very smart in their neat uniforms.

The success of the school winning the diploma, the pupils qualifying for the short course, and the school winning the Haslam shield, will be announced later. The latter award was not made last year owing to changes in the rules governing it, and the impossibility of deciding it under those conditions. In future it will be awarded to the school winning the most points in school work based on attendance, and will be awarded as soon as the results are compiled.

The committee wish to thank all who in any way assisted in making the fair a success. In addition to those already mentioned in this report, the committee desires to express its gratitude to Mr. S. H. Gandier and Mr. W. S. Benn, who were always most ready to give advice and assistance.

Card of Thanks

We wish to thank all the friends for their kindness and sympathy through the sickness and death of our beloved brother Verrie.

Mr. and Mrs. J. E. Hoshaw and family.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD

In the Estate of David Williams, formerly of Clareholm in the Province of Alberta, late of Walla Walla in the State of Washington, United States of America, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named David Williams, who died on the 22nd day of September A. D. 1925, are required to file with the undersigned J. R. Watt, Solicitor for the Administrator, by the 30th day of November A.D. 1925, a full statement of their claims and of any securities held by them, and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 23rd day of September, A. D. 1925.

J. R. Watt,
Solicitor for Clyde H. Curtis,
the Administrator.

D. A. ANDERSON

Amazing Hold That Wheat Has On Our Every Day Life And History Of The World

It may seem a hackneyed subject, for it is in the mind and on the tongue of everyone today—farmer or business man—from Halifax to Vancouver, and before our eyes wherever we go, all over the provinces; in a day or two it will be in the hands of millions of husky harvesters in the grain fields of sun.

And yet it may be questioned whether many of us have ever paused to consider the really amazing hold that wheat has on our every-day life and on the history of the world.

The grain is all golden with it now; and soon the stubbed stooks, reaching round and round the acres, will be crawling up the steep, leading road after day; behind the burning separators the straw piles will rise the little golden grain, wheat will be all the roads and the fields, and the husks be hustling from dawn until the stars appear.

Yet this is but the climax to a whole year's toil and thought; for we dream of wheat all winter, work for wheat all spring, worry over wheat all summer, through, and share wheat from dawn till fall until the snow is on the ground again.

The truth is that no gold or gem were ever sought for with half the frantic energy we spend on wheat.

Equally striking is the place which wheat holds in the realm of national history. Richard Jeffrey, looking out across the wheat fields of the United States many years ago, saw in them a scene which invasion after invasion swept those shores in ancient days.

First the Romans, then the Saxons, then the Danes, and last of all the Normans came and saw and conquered.

They needed golden grain, they sought rich grain lands, they wanted wheat. "The wheat fields are the battlefields of life," he said.

He was hardly wrong. In the struggle between nations is still one for the ownership or for the control of corn. For nations, for colonies, for mines, factories, turnips, the counter, the desk—no one can live on iron, or gold, or cotton—the life is really seeds of wheat.

The wheat which will be raised to elevators on all our fertile fields, through the stage, that which grew in the little fields of Scotland when Burns welded the fields, and Highland Mary welded the cleaves for her lover, is even much the same as that which wheat in the pleasant valley of Bethlehem in days when the angels came after her kinsman's rasps, and found her amid the golden ears; it may be even little different from the wheat which was planted in Egyptian tombs more than four thousand years ago.

But the wheat of today, and the wheat of ancient Egypt, are called wheat. It is wheat cultivated, cultivated, developed and perfected. And this wheat, which has not been the work of any experimental farm. Behind the wheat of today, and the wheat of ancient Egypt, lie the legends unrecorded of tens of thousands of years of agriculture. The triumphs of modern farming are worthy of the legends of olden times, but the legends of olden times fade away into comparative insignificance when compared with the work done, since before the dawn of history, by humble and forgotten tillers of the soil.

Look again at that sea of wheat under the harvest moon. Rank on rank the sheaves are standing, miles on miles of them, a phoshy army rising out of the buried centuries. In the light of day you might tell me that the sea of those sheaves was somewhere round a hundred years; but here, in the moonlight, you realize that they were already old before the Pyramids were planned.

So, we take our hats off to the Ancient and Honourable Order of Husbandmen, who turned wild corn into wheat, and gave the world the grain of the future—the "Rev. R. Grim, B.A., in The New Outlook.

Old Bell Legends

July, the month of thunderstorms, is held to be a busy time for the farmers, for old-time farmers are recommended ringing the church bells as the surest means of dispelling thunder or preventing damage by lightning. Some of the old bells bear witness to the belief in their inscriptions. At "Which no Bore I do despise" and "Lightning and thunder I break asunder," while church bells in various European countries contained many hints for religious devotion or money "for rings in the thunder."

Better Help

"I'd be much better off if I'd put that sign on the mill here."

"What sign?"

"Not no sign."

W. N. L. 1922

Improvement In Canadian Bacon

Good Prices Are Obtained As A Result Of Better Grades

Canada, normally produces more pork than she consumes. Great Britain provides the only market for our surplus, and the failure of our pork industry depends, therefore, on our ability to produce a commodity that the British market will buy. The best seller of all pork products on that market is the good quality bacon side, generally known as "Whitshire." Securing the need for improvement in our export bacon, about three years ago the Dominion department of agriculture launched a bacon hog campaign which includes the grading of hogs at packing houses and stockyards, demonstrations in hog grading at country shipping points, demonstrations on export bacon sides, winter short courses at county points and at 1925 county points, and the education of boys and girls' wives clubs and of bacon hog farms, and assistance in the filling of orders for pure-bred boars and sows of stock of hogs.

The success of this campaign has been striking. In 1924, there were 92,000 more hog markets where graded select hogs than in 1922, and there has been a remarkable improvement in the quality of hogs in the select or "black smooth" grade. Canada's commercial position overseas has also been improved in the result of the narrowing in price between top Danish and top Canadian bacon. A Canadian packing house entered the London market in 1924, and showed last autumn and the autumn before and carried off premier hams each year. In 1924 the marketing of hogs was the heaviest in the history of this country yet the prices for the concluding weeks were the highest in the history of the country.

It is to be expected that the industry to export our surplus to advantage and to increase domestic consumption, the direct result of improvement in quality.

Depth Of Wheat Seeding

Seeding to a Depth of From Two to Three Inches Most Satisfactory

From 1912 to 1923 an experiment was conducted by the Dominion Department of Agriculture in the Dominion experimental farm testing the effect of sowing wheat at depths of one, two, three and four inches. The results have been as follows: In the first year, the heaviest dry lay and the test has been conducted each year on summerfallow. In ten years the average has been: one inch, 25 bush; two inches, 39 bush; three inches, 29 bush; four inches, 25 bush, 15 lb. In the first year, the superintendent states that similar results have been obtained with oats on fall-ploughed land, that the soil used has been heavy clay loam and given the best yields. The proper depth, however, must depend on the soil and the condition of the soil. If the soil is too hard, the seed will not get down to the depth of the soil, and the seed will be too far to grow to reach the open air and will be killed by the frost. If the soil is too soft, the seed will be too deep to reach the open air and will be killed by the frost. The superintendent states that the best results have been obtained with a depth of two to three inches will be found satisfactory.

Grasshopper Control

Both Natural and Artificial Methods Should Be Studied

Messrs. R. C. Frohner and E. R. Buckell, of the Dominion entomological branch, are authors of a bulletin, No. 28, of the department of agriculture, Ottawa, dealing with the "Grasshoppers of British Columbia, with particular reference to the influence of injurious species on the range lands of the province." While the authors thus ascribe themselves there is much in the bulletin of a great deal more common interest. As they say, while in garden, on meadow and in cultivated grain or hay fields, grasshoppers can be controlled by poisoning of baits, by artificial barriers, or, in some cases, by cultural methods, on the open range such measures can only be practised with difficulty. This being the case the study of both natural and artificial measures of control becomes of prime importance. In furtherance of this object the bulletin contains much of interest.

Decides to Retire Down

Captain St. John of the former Hapgood army, has finally decided to retire down at the age of 114 years—that, after all, hatched out last night, the right time for him when he began to grow young in years. Consequently he has taken unto himself a wife, who is comparatively of better age, 75 years.

Is Appointed Director

St. George McLaren, B.Sc., has been appointed Director of the Canadian Pacific Railway, who recently arrived in Canada to attend the funeral of the late George Morris Brown, chairman Canadian Pacific steamships. Later St. George was appointed a Director of Canadian Pacific steamships in succession to the late St. Thomas Fisher.

St. George McLaren Brown, European General Manager of the Canadian Pacific Railway, who recently arrived in Canada to attend the funeral of the late George Morris Brown, chairman Canadian Pacific steamships. Later St. George was appointed a Director of Canadian Pacific steamships in succession to the late St. Thomas Fisher.

St. George McLaren Brown, who was born in Hamilton, Ont., in 1862 was appointed agent of the company at Vancouver in 1887 from which post he was promoted by degrees to that of General Passenger Manager. St. George is a member of the British Empire in recognition of his distinguished services as Assistant Director General of Movements and Transport, for the British Government during the last three years of the war in which capacity he served with rank of Colonel Imperial Forces.

St. George McLaren Brown, who was born in Hamilton, Ont., in 1862 was appointed agent of the company at Vancouver in 1887 from which post he was promoted by degrees to that of General Passenger Manager. St. George is a member of the British Empire in recognition of his distinguished services as Assistant Director General of Movements and Transport, for the British Government during the last three years of the war in which capacity he served with rank of Colonel Imperial Forces.

Sugar Beet Industry

Is Expected to Revolutionize Conditions in Southern Alberta

The sugar beet industry established in Southern Alberta would revolutionize conditions in the irrigated areas on the prairie, was the assertion of E. Palmer, assistant superintendent of the experimental farm, Summerland, B.C., in his address before the recent convention of the Western Canada Irrigation Association at Kelowna. He claimed that the results of the first season's operations were so good that 15,000 acres in beets were sown for next year, and he forecasted the time when there would be a sugar beet factor in the western to take care of the beet crop.

Feeder Purchase Policy

Government Offers Assistance to Eastern Canada Cattle Feeders

Announcement of a feeder purchase policy, under which the Dominion livestock branch of the department of agriculture will again offer assistance to cattle feeders from Eastern Canada who purchase one or more loads of feeder cattle, either at one of the "feeder" sides to be held the fall, or from the range area, is announced. Under the terms of this policy, the government will pay a one-way fare and incidental expenses of a feeder to the west, who will be expected to conduct his business on conditions set forth by the department.

Cow being mined under the sea for more than four miles from the coast of England.

At its greatest breadth the English Channel is 156 miles wide.

Sweet Clover Cultivation

Value of Clover As a Soil Builder Has Been Definitely Proved

In his pamphlet on "Sweet Clover," Mr. Derick, of the Brandon, Man. Dominion experimental farm, shows out some suggestions deserving of consideration not only in his own province, but generally elsewhere. After alluding to the fact that the value of sweet clover as a soil builder has been definitely proved, Mr. Derick says: Sweet clover can be depended upon for good yields of hay under almost any conditions of soil and climate; as a pasture it has a carrying capacity unequalled by most crops; it is an abundant seed producer; it can be made into silage with but little trouble; it is a good nurse crop for use 10 or 15 pounds of clover seed per acre is a satisfactory rate of seeding; shallow seeding is preferable, provided the seed-bed is not too dry; seeding with a nurse crop at slightly less than the normal rate is most economical; leaving the crop in the early bud stage, leaving a four or five-inch stubble will make the most palatable hay and allow for a second crop; heavy harrowing with the binder and curing in the field will preserve the maximum amount of leaves and reduce the cost of handling the crop; browse grass has advantage over other grasses as a mixture with sweet clover; growing sweet clover in the fall is a good production is recommended; inoculation of the seed is inexpensive and is advisable on the newer fields.

Saskatchewan Livestock

Value of Livestock in the Province Estimated at Nearly \$14,000,000

Saskatchewan's swine population increased by nearly 20,000 during 1921, as compared with the previous year, while a slight decrease was recorded in the cattle, sheep and poultry population of the province, according to a statement issued by the provincial livestock commissioner. The number of the various livestock in the province, according to the report is as follows: Horses and mules, 1,739; swine, 148,151; beef cows, 10,895; calves, 18,682; calves, 32,811; other cattle, 22,747; sheep, 123,226; and pigs, 82,519. The aggregate value of Saskatchewan livestock for the year is given at \$13,295,000 and the combined total value of livestock and livestock products was \$19,822,276.

National Opulence

Results of Farming Industry Is Increasing Very Rapidly

Farmers, who, as individuals, have been discouraged, should take heart in the increase of \$42,782,960 in the wealth of Canadian farmers in 1921 over the previous year, with a total agricultural revenue of \$1,455,258,000. Workers in our "largest industry" can not isolate themselves but must come to the conclusion that they are rich and that the results of national wealth and progress of benefits therefrom. Mortgage and blighted crops rise as signs of national wealth, and the results of national wealth and progress of benefits therefrom. Mortgage and blighted crops rise as signs of national wealth, and the results of national wealth and progress of benefits therefrom.

Australia Wants British Goods

In the House of Representatives, Melbourne, Australia, Hon. R. E. Pratt, minister of trade and customs, introduced an amendment to the Customs Act imposing the condition that imported goods, to enjoy the full tariff preference, must be 75 per cent of British manufacture.

Discover New Zinc Mines

It is understood that discovery of zinc in the Sudbury nickel district of Northern Ontario has led to the formation of a company by an American syndicate to diamond drill on an extensive scale. The drill will test out the size of the deposits and the present outlook is very bright. The British Columbia furnishes most of Canada's production with Quebec in the field in a small way.

Don't Waste At Windsor Castle

The Queen's dolls' house, which was inaugurated last year at Windsor, now reopens in Windsor Castle, in a room specially designed by Sir Edwin Lutyens. It will be exhibited to the public before long at all hours when the Castle is open to visitors.

Nice Disposition

"Look here, waiter, I've been waiting half an hour for that steak I ordered. I'm hungry."

"Yes, sir, I know it, sir. Life would be just living, sir, if everyone was as patient as you are."

Price Winning Clydesdales for Canada

The prize price Clydesdale is one of a shipment of six registered horses which were shipped from Ontario to the United States for the "Great Ship" "Metagora," for Mr. James Torrance and Mr. Wm. McHenry, of Ontario. The experts are Messrs. A. Montgomery and C. of Jorland, Kirkcaldyshire. "The opinion of the experts is that this is one of the finest blooded horses that has left Scotland for many years."

Value Of Tree Planting Is Now Better Understood By People Of Prairie Provinces

Rat Invade The West

Are Now Found in Eastern Part of Saskatchewan

"Kill the Rat!" is the title of a sanitation bulletin recently issued by the Saskatchewan department of public health, in which an urgent appeal is made to the people of Saskatchewan to take active steps to check the invasion of this province by these pests. "The rat is responsible," says the bulletin, "for the spread of bubonic plague through the flea which infests the rat's fur. Plague, or black death, has killed 25,000,000 people in Europe, and is today prevalent in India, Africa and in recent years has been carried to the continent of America. Canada, so far as has been known from this dread disease, but in our country it is to be kept free from the menace of plague every community must concentrate on the destruction of the rat pest. THE UNITED CHURCH
PRESBYTERY

A meeting of historic interest convened in the Bethel United Church on Thursday, September 10, when another step was taken in the work of organizing the United Church of Canada by the establishing of the High River Presbytery of that church. The roll of Presbytery was duly constituted with 14 ministers and 15 lay representatives duly enrolled as the charter members of the new presbytery, as well as those who were present as corresponding members.

The honor of being elected the first chairman of the new presbytery in the United Church was conferred upon the Rev. Geo. Webber, the pastor of the Bethel United Church, and the former chairman of the Methodist District meeting. The Rev. Wm. McNichol, pastor of the High River United Church, and former clerk of the High River Presbytery of the Presbyterian church, was elected secretary of the presbytery.

Much attention was given to the home mission work within the bounds of the presbytery, and efforts will be put forth to minister to some areas that have been neglected in recent years. The committee was also appointed to look into the matter of re-organizing some of the local units of the United Church in the north-eastern part of the presbytery. The superintendent of missions, Rev. Dr. J. T. Ferguson, was in high spirits and assisted in the planning of this work.

A resolution dealing with local union problems within the presbytery was presented from the congregation of St. Andrew's church, Nanton, and was adopted. "Whereas, on several occasions, it has been demonstrated that St. Andrew's United Church is in favor of local union, we therefore ask the Presbytery, at its first meeting to undertake to arrange the matter of local union on a basis agreeable to both parties."

In considering this resolution it was intimated that the decision of St. Andrew's church, Nanton, Rev. O. R. Lavers, was willing to resign in the interests of the local union. It was also found that the desire for local union at Parkland was influenced by the action of the two churches in Nanton, as they could not see their way to unite until the Nanton churches had united.

The discussion brought out the information that, until the Alberta Conference of the United Church was organized next month, and the provincial settlement committee regularly constituted, there was much uncertainty as to the procedure to be followed in this matter. A considerable discussion the following resolution was adopted: "Having considered the resolution of St. Andrew's congregation of Nanton, this Presbytery would say that, inasmuch as, at the forthcoming conference, it is expected that some definite action will be taken with regard to the settlement committee, and also that some lead will be given in the matter of local union problems at that time, therefore this High River Presbytery deems it advisable that no immediate action be undertaken by the Nanton congregations, and the members of this Presbytery believe that it is not advisable that any pastor should resign his pastoral charge at this time so as to be in a position at least until he has first consulted with and obtained consent of his Presbytery."

The Rev. Wm. McNichol and Geo. Webber were appointed to represent the presbytery on the provincial settlement committee. The Rev. Dr. Tuttle, principal of the United Theological College, Edmonton, and Dr. Ferguson, superintendent of missions, presented the plans of the maintenance and extension fund of the United Church to the members of presbytery, emphasizing both the spiritual objectives as well as the industrial and financial general funds of the United Church during the coming year.

The Presbytery endorsed the proposals, and accepted a contribution of \$10,000 as the objective for the year. This amount was allocated to the various pastoral charges, some of which are: Clareholm,

St. Andrew's, \$500; Clareholm, Bethel, \$12,000; Granum, \$400; Carmangay, \$500; Parkland and Staveley, \$800. The Rev. J. N. Wray was appointed secretary for this campaign, and the following were appointed a committee of five: Revs. G. W. Langille, O. R. Lavers, J. N. Brunton, Messrs. C. H. Marshall (Nanton), Geo. Melville (High River), Revs. Wm. McNichol and G. G. Webber are also members of the general committee of direction for southern Alberta.

The following lay delegates were appointed to represent the presbytery at the conference of the United Church to be held in Calgary next month: Mrs. L. C. McKinnay and Thos. Darch of Clareholm; J. C. Brown of Granum; C. A. Spencer of Parkland; M. MacLaren of Carmangay; J. J. Wainman and C. H. Marshall of Nanton; H. D. Johnson of Cayley; Geo. Melville of High River; Wm. Jennison of Vulcan; Mr. Shultz of Blackie; Robt. Anderson of Dintion; and S. Gehman of St. Andrew's. The following were appointed as alternates: Al. Kelley of High River; Mrs. W. White of Nanton; James Bruce of Parkland; H. H. Howard of Cayley; and Donald Sinclair of Vulcan.

A joint committee of ladies of St. Andrew's and Bethel churches served a banquet to the members of presbytery in Harrison Hall, this feature being greatly appreciated by all, and calling forth a hearty expression of thanks.

The public meeting held in St. Andrew's church in the evening drew an interested audience of citizens and members of presbytery, who listened to two excellent addresses on the General Council of the United Church, and the task of the church, given by Mrs. McKinnay and the Rev. Dr. Ferguson. Choice music was rendered by a union choir, under the direction of W. G. Moffat, and Harold Soley rendered a solo in his usual effective and pleasing manner. The meeting closed with an impressive service, conducted by the Rev. G. W. Langille. The members of presbytery departed feeling that they had spent a most delightful and profitable day, and that the work of the United Church was given another step in this part of the province.

TRANS-CANADIAN FORD
COMING

Citizens of Clareholm will have an opportunity of seeing the improved Ford touring car, the recent announcement of which attracted widespread attention, when the Trans-Canadian Ford arrives here.

This car started from Halifax, September 7, and is attempting to reach Vancouver by an all Canadian route and under its own power all the way. The trip, according to Ford officials, is being undertaken in commemoration of the twenty-fifth anniversary of the formation of the company, coincident with the production of the improved cars, and with a view to attracting attention to Canadian good roads and the Trans-Canadian highway.

Dr. E. E. Doolittle, president of the Canadian Automobile Association, and a noted authority on Canadian good roads, has voiced his enthusiasm in the trip, and has lent invaluable assistance in routing the car through the less traveled parts of the Dominion through which it will travel.

Trans-Canadian cars have heretofore used the ferry boats in completing the trip, and have entered the United States territory in order to facilitate the journey. Now, however, will be able to use the Ford trip, and where the roads become absolutely impassable, the ferry boats will be used in the Canadian Pacific Railway lines, permission having been given by that corporation to make use of its permanent ways under its control.

Accompanying the car will be the noted Motor Company's official motion picture photographer, and a newspaper man who has had considerable travelling experience. These men have been given instructions to work up everything that can possibly be used at home and abroad, to popularize Canada's tourist trade, and attract travellers to the Dominion.

With a view to obtaining a record of the trip, the company has had prepared an artistic parchment embracing a map of the Dominion, together with facts setting forth the purpose of the trip.

Mayors of the larger towns through which the car will travel will be invited to sign this parchment, and when the trip is completed, steel engravings will be made and copies sent to each of the mayors along the route.

The motion picture photographer will be available to take scenes in the various districts as desired by civic officials and these will be used to advertise the different communities.

Macled Riding Liberal-Conservative Association

A meeting of Liberal-Conservative will be held in J. Switzer's office on Thursday 1st October at 8 p.m. to organize a branch of above Association.

J. R. Watt, Member of Executive, Macled Liberal-Conservative Association.

Women's Institute Constituency
Conference of Clareholm and
Macled Constituencies,
Agricultural College,
September 26

Here and There

All tourist's records, motor and train, are being broken at Banff, Alberta, this year. More than 15,000 cars were registered by the first of August with the big rush yet to come. As many as 2,000 were over the limit at one time in the Government auto camp ground.

Maple sugar and maple syrup production in Canada during the season of 1922 amounted to 9,791,250 pounds and 1,872,290 gallons, respectively, with an aggregate value of \$6,825,416. This compares with an output of 9,385,415 pounds of maple sugar and 1,970,000 gallons of maple syrup during 1924. Quebec province accounted for 90 per cent of the production of maple sugar and over half of the output of maple syrup.

Production of the four basic industries of British Columbia during 1924 aggregated in value \$210,892,793, as compared with \$207,044,761 of the previous year, according to a statement issued by the Provincial Government. The 1924 production was made up as follows, with 1923 comparative figures in brackets: Forest products, \$40,702,000 (\$40,674,400); agriculture, \$60,922,224 (\$59,159,798); mines, \$45,704,004 (\$41,204,320); and fisheries, \$21,256,965 (\$20,795,925).

Canada's ordinary revenue for the four months of the present fiscal year ended July 31 last, shows an increase of \$2,352,163 over the same four-month period last year, according to a statement made by the Department of Finance. Ordinary revenue for the four months of 1925 amounted to \$147,709,416. Ordinary revenue for the four months of 1924 amounted to \$145,357,252. The period shows a decrease from \$26,545,441 in 1924 to \$20,555,992 this year.

George H. Ham, known throughout Canada as the Grand Old Man of the Canadian Pacific, celebrated his seventy-eighth birthday on Sunday, August 25th, and was the recipient of a deluge of congratulatory messages from all parts of the country. Col. Ham has been with the Canadian Pacific since 1891 and by his social activities and as a poet, as an orator has made for himself and for the company a veritable army of staunch and faithful friends.

Butter exported from Canada during the twelve months ending June 30, 1925, amounted to 25,068,120 pounds, valued at \$8,574,784, a decided increase over the figures of the previous year when exports amounted to 15,668,379 pounds; valued at \$5,031,634, according to a report issued by the Federal Department of Agriculture. Shipments were made to the United Kingdom, the United States, South America, South Africa, India, Australia, China, Japan, Germany, Belgium, Cuba, Holland, New Zealand and many other countries.

James Oliver Curwood, the well-known American novelist, who crossed not long ago to Europe on the "Empress of France" and returned a few weeks later to Canada on the "Empress of Scotland," has received the following message from the "Scotland" to the Canadian Pacific headquarters in Montreal: "Can never fully express my appreciation of the splendid treatment accorded me by Captain Gillies and Captain Griffiths, and the staffs of the 'Empress of France' and the 'Empress of Scotland.'"

A party of British journalists is now touring Canada at the invitation of President E. W. Beatty, of the Canadian Pacific Railway, for the purpose of gaining first-hand knowledge of economic and industrial conditions in this country. They are John A. Bunt, Glasgow Herald; G. J. Jory, London Daily Telegraph; R. E. Paterson, London Times; H. Read, South Wales Daily News; Cardiff; Captain E. Altham, London Morning Post; Hugh Martin, London Daily News; R. G. Caldwell, Western Morning News, Plymouth; W. A. Benton, Daily Chronicle, London; J. P. Chapter, Westminster Gazette, London; John Sagers, Belfast Telegraph.

Farmers Attention

We are quoting the following on Gas Oil, Distillate, and Lubricating Oils, F.O.B. Your Town. On orders for 250 gallons or over we will deliver F.O.B. your farm.

Gas Oil, 4 points higher than kerosene..... 22c per gal.

Distillate 36-40 Re. Gravity..... 20c per gal.

Cosden Lubricating Oil, the Velvet Oil—

Motor "E" Light..... 75c per gal.

Motor "E" Medium..... 80c per gal.

Motor "A" Heavy..... 85c per gal.

Motor "B" Extra Heavy..... 90c per gal.

Motor "H" Super Heavy..... 95c per gal.

(Cosden Oil is made of a pure paraffin base stock, with the paraffin removed by a catalytic process. We absolutely guarantee this oil to be one of the finest quality oils that you can buy for motor use. Motor "H" we highly recommend as a splendid tractor oil.)

We suggest that you secure a trial 5 gallon can of the quality you are using at our Agents.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; not is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Claresholm Local News

Bethel United Church

Next Sunday, September 27, will be a special day at Bethel church. In the morning at 11 o'clock the special "Rally Day" program will be used in a service in which the Sunday school session will be merged with the morning service of worship. Special interesting numbers in which the boys and girls will take part are being arranged for. All parents are cordially invited to come and bring the family. You will all be welcome.

In the evening at 7:30 o'clock the pastor will conduct a special adult rally service, and the theme of the day will be discussed "Loyalty to Jesus." The choir under the direction of W. G. Moffatt, will render special music at this service. A welcome for all. Mid-week services each Wednesday evening at 8 o'clock in the lecture room.

Four Square Gospel

Meetings conducted by Evangelist R. A. Reynolds and wife in Odd Fellows' Hall, Sunday, September 27th.

11 a.m. worship and breaking of bread.

3 p.m., The valley of dry bones. 7:30 p.m., Delivered from the death cell.

Truth is stranger than fiction. Come and hear the truth spoken in love. Bring your bibles. Good music and singing. Everybody welcome.

B SQUADRON ORDERS

All clothing and equipment must be turned in immediately for inspection.

REVIEW-ADVERTISER OFFICE

Ten Thousand Alberta Farmers

with

One Million Acres of Wheat

Are now ready to join the Alberta Wheat Pool.

A Commission of \$1.50 per Contract will be paid on all bona fide contracts sent to Head Office

Between September 28th and December 31st, 1925.

The campaign is open to the public and a commission will be paid to all canvassers except members of the Board of Directors and employees of the Pool.

Delegates and Local Secretaries are eligible to canvass and to receive commission.

CONDITIONS OF CAMPAIGN

- (1) All Contracts sent in must be complete as to signature of the grower, his Post Office address, land location, etc. If the grower's name is not clearly written, print it.
- (2) A Canvasser's Report properly filled in must accompany each parcel of contracts. This will show to whom the commission should be paid.
- (3) Where the membership fee of \$3.00 is paid in cash by the signer the canvasser may remit \$1.50 to Head Office and retain the balance as his commission.
- (4) Where the grower signs the note for \$3.00, the canvasser should see that the signature is properly witnessed. A commission of \$1.50 per contract will be mailed to the canvasser's address as shown on the canvasser's report accompanying the contract.
- (5) Contract forms, canvasser's report forms, and self addressed envelopes, are being sent to all Wheat Pool Delegates, Wheat Pool Local Secretaries, U. F. A. Secretaries, and Secretaries of Municipal Districts, or you can write to Head Office for supplies.

Increase your selling strength by an additional Ten Million Bushels in This Year's Pool.
